## **Computer User Questionnaire**

Many people experience a variety of symptoms after working at their computer for some period of time. Surprisingly, many don't relate those symptoms directly to using the computer. Instead, they mistakenly attribute headaches and tired eyes to overall stress at work, rather than to visual fatigue that can be alleviated simply with the proper eyewear prescription.

If you experience any of these symptoms, please indicate the level of discomfort below:

Symptom	Mild	Moderate	Severe
Headaches during or after working at the computer			
Overall bodily fatigue or tiredness			
Burning eyes			
Distance vision is blurry when looking up from the computer			
Dry, tired or sore eyes			
Squinting helps when looking at the computer			
Neck, shoulders, or back pain			
Double vision			
Letters on the screen run together			
Driving/night vision is worse after computer use			
"Halos" appear around objects on the screen			
Need to interrupt work frequently to rest eyes			
If you experience any of these symptoms, we of eliminate the symptoms and dramatically improcomputer. These eyewear lenses result from new computer users. Our office has been trained and on to you.	ve your co w technolo	omfort level w	hen working on a specifically for
